

LegitReach

Data intelligence for silicon optics

Pre-seed memo / July 2026

Optics buying is too messy.

200G, 400G, 800G, and 1.6T overlap. Buyers must check reach, protocol, firmware, power, and heat before every PO.

miss once: stranded ports, delayed racks, extra power, thermal rework

Co-packaged Optics. The Type-C moment.

Pluggables carried the last era. Co-packaged optics moves light beside switch silicon because bandwidth, power, reach, and heat are now the bottleneck.

Buying intelligence layer for silicon optics.

Data and research first. Buyer workflows next. LegitReach CPO after the market tells us what to build.

SiPho Model

Compatibility, substitution, vendor risk.

Tetration

Simulator distributed as a 'manga-style' monthly magazine.

VISION

LegitReach CPO

Long-term product wedge once buyer data proves the market.

Marvell/Celestial validates the prize: about \$3.25B upfront, with a \$1B run-rate target by Marvell FY2029.

Silicon Optics is superior, strategic, & urgent.

TAM

\$13.18B

total silicon optics, 2031

SAM

\$764.3M

CPO portion, 2031

SOM

\$1.5M ARR

data intelligence for silicon optics

CPO hardware stack	INDICATIVE COST
Switch ASIC + package	\$5k-25k
Silicon photonics PIC	\$100-1k
Optical engine	\$500-3k
External laser source	\$200-1k
Co-packaged substrate	\$1k-10k
Fiber attach/connectors	\$50-500
Thermal/cooling	\$100-2k
Test + validation	\$10k-250k
Switch system	\$25k-100k+

Win the buyer before the PO exists.

Search, newsletter, community, and paid pilots convert technical confusion into buyer intent.

0-90 DAYS

Public model + newsletter

Launch 500 compatibility paths and capture high-intent searches.

3-9 MONTHS

Paid teams + pilots

Sell team access, buyer exports, and validation notes.

9-18 MONTHS

Enterprise layer

CPO roadmap intelligence, procurement data, and hardware thesis.

Premium intelligence beats generic research.

B2B Enterprise Model

TEAM

\$5-15k/yr

research + model

ENTERPRISE

\$25-100k+/yr

database + guidance

EXPANSION

Reports

validation + data feeds

Research influence plus hardware moat.

Data driven team.

Market experience, software execution, & lab.

Manthan Admane

Applied Materials

Manas Kalangan

Founding engineer

Rocket Money

Research Partner

Mentorship & Labs

MIT-WPU

\$500k pre-seed.

18 months to prove paid intelligence, buyer workflow, and the CPO hardware wedge.

BUILD

SiPho Model

500+ compatibility paths, part pages, newsletter, and community capture.

SELL

10 paid teams

Team subscriptions, enterprise pilots, validation notes, and exports.

PROVE

\$1.5M ARR path

Repeatable buyer intent, order clicks, and CPO hardware partner thesis.
